Frontend Development

## PERSONAL PROJECTS

### Forkify

- JavaScript based Project to Search your favorite food items required ingredients to prepare.
- <https://forkify-pavi.netlify.app>

### Worker Dashboard

- React based user dashboard Application. Developed by infusing react hooks and Firebase. Implemented responsive design to ensure that the website is optimized for different devices and screen sizes for handling worker information.
- <https://workerdashboard.netlify.app>

### Landing Page

- React based Landing Page project with integration of Local Storage Authentication and Material UI.
- <https://pavi-react-landing-page.netlify.app>

### Youtube Clone

- React based YouTube clone project with integration of Redux store and YouTube suggestion and video API for fetching videos and contents. Created reusable components using React and Redux to ensure consistency throughout the website.
- <https://react-youtube-prj.netlify.app>

### IMDB Clone

- React based Project to get to know about recent movies rating, description and review. I worked with a team of designers and developers to implement the new design and functionality using React, Redux, and Sass
- <https://react-imdb-site.netlify.app>

### GPT Website

- React based Website clone project with integration of Redux store which includes tailwind CSS implementation.
- <https://cgpt-website.netlify.app>

## CERTIFICATE

Namaste.dev (12/2022 - 02/2023)

Frontend development course covering react concepts and its technologies.
